

A SIMPLE AND EFFECTIVE WEBSITE TO ENABLE EASY EVENT REGISTRATION

EASY REG

SIMPLIFY YOUR EVENT MANAGEMENT

INTEGRATE YOUR REGIS- TRATION WITH YOUR BAD- GING SYSTEMS

INTEGRATE YOUR REGIS- TRATION WITH YOUR BAD- GING SYSTEMS

Get the information you need as seamlessly as possible with a branded event registration website and bespoke registration form. A pre-event system that combines your website with your mailing campaign and badging system. Easy to use both for you and your clients!

Our expert team of webmasters will work with you to create a bespoke website incorporating the design and branding of your company or event. We can advise you on how best to manage hotel bookings, ground transfers and conference bookings within a fully customisable registration form with no limitations. We can help you to manage or export data such as booker demographics and number of participants per session.

A secure online payment process can also be included which will automatically generate an invoice for your customers, reducing administration time.

All of the registration information is then held in a database from which you can run an email campaign to send out itineraries, confirmations, joining instructions or thank you messages (see easyMAIL) and you can also use this information to automatically create your event name badges (see easyBADGE).
