

# CONTROL ACCESS AND TICKETING WITH DIGITAL SCANNERS

# EASYSCAN

## LIMITS FRAUD

## EASY TO USE

## REAL-TIME REPORTING

Control access to your event with easy to use and reliable digital scanners. This technology is already installed at the largest concert halls and festivals, it's time to go digital with easySCAN!

During registration, your attendees have received an access ticket with a personal barcode.

Once they arrive on site, your hostess/steward scans the barcode to verify the ticket. Each barcode can only be scanned once.

Scanners can be connected together via an online system so that each registration from all of the scanners is recorded in one place, giving you instant access to your delegate details and attendance figures.

EasySCAN can be combined with OneTec's online ticketing platform – EasyTICKET
